

# Rifqi Afta Ronanda

IT and Web Engineering

## Turning data into useful decisions.

I connect engineering thinking, machine learning, and clear interfaces to build practical tools for research and operations.

Engineering Physics background at Universitas Gadjah Mada. Exploring IT and AI engineering opportunities with companies in Japan.

### FOCUS

Practical data workflows, machine learning, responsive web applications, and clear technical communication.

### SELECTED WORK

Quantum banking research hub | Manabi Japanese learning dashboard

### HOW TO READ THIS PORTFOLIO

Each case separates the implemented workflow from its intended business value and remaining validation. Commercial outcomes, production deployments, and performance gains are not claimed without evidence.

Repository documentation reviewed: 7 October 2026. LinkedIn is provided as a profile link; detailed employment information has not been independently reviewed for this edition.

## 03 / Quantum banking research hub

Interactive web application | React / Supabase / CSS

### PROBLEM

Research materials, demonstrations, and report drafts can be difficult to navigate when they live in separate tools.

### IMPLEMENTATION

A React dashboard with 30 presentation materials, interactive labs, an outline editor, local-first storage, and optional Supabase synchronisation.

### INTENDED BUSINESS VALUE

Brings reading, demonstrations, and drafting into one workflow to support research communication and structured review.

### EVIDENCE

Repository documents responsive navigation, an outline editor, Supabase Auth and Row Level Security, revision history, and offline fallback.

### VALIDATION NEEDED

Research communication tool. No claim of bank deployment, regulatory endorsement, or measured productivity improvement.

---

## 05 / Manabi Japanese learning dashboard

Learning application | React / Web Speech API / localStorage

### PROBLEM

Self-study benefits from a clear path through lessons, practice, feedback, and progress tracking.

### IMPLEMENTATION

A responsive React interface with 18 Irodori Starter lessons, text-to-speech, graded quizzes, timed practice, and local progress storage.

### INTENDED BUSINESS VALUE

Supports independent study through immediate explanations and a consistent lesson-to-practice workflow.

### EVIDENCE

Repository documents 18 lessons, 30-question practice sets, responsive layouts, and localStorage progress.

### VALIDATION NEEDED

Independent practice application, not an official JLPT or JFT-Basic simulator. Learning gains and language proficiency are not claimed.
